

# Scala Services

Scala Services can help you do more with your digital signage system, increasing the return on your investment.

## Benefits of Scala Services

- Improve the look of your digital signage network. Better looking content gets noticed and has a greater impact.
- Maximize the benefits of your digital signage network while reducing costs of operation.
- Learn how to use Scala from experts who have years of experience with all kinds of applications.
- Discover new applications. See what else you could be doing with Scala.

## Consulting Services

---

Need help getting your network up and running? When you're stumped by a major technical problem or challenging installation, you can hire our expert team to help out. We can assist with system configuration and networking issues as well as custom VB/ScalaScript programming. With more than twenty years of experience and the best digital signage experts in the world, we're sure to have the resources you need.

## Content Services

---

Digital signage applications are all about content. Whether it's information, education or advertising, content is often the most critical factor in the success of a network. Content Services enable you to achieve your communication goals quickly and effectively. Scala Content Services can help you create or create for you the best possible content for your environment. Whether you need help creating a template, or want to have Scala do all of the work, Scala Content Services will provide you with amazing results.

## Project Management Services

---

We know that rolling out a digital signage network is not always as easy as it seems, but our Project Management Services can make it a breeze. We'll help you through every step of the process and offer our suggestions on best practices and how to avoid pitfalls. Whether you need a few hours of help or if you need us to manage the entire deployment, we're happy to help.

# Scala Services

## Information Services

Scala offers many options for integrating third party information into your digital signage network. If you're looking to integrate engaging real time content into your digital signage, Scala software can quickly and easily connect to Information Services like Accuweather.com, Data Call, and virtually any RSS or real time feeds. These Information Services are available from third parties and offer great attention-grabbing content for your audience.

## Pre-Sales Consulting

If you're looking to start out with a pilot or to see what customization you could do with Scala software, pre-sales consulting can help you decide what would be the plan for you and your company to leverage while rolling out a digital signage solution. Pre-sales consulting services give the upfront support you need to make sure that your big plans for your digital signage network turn into reality.

## Training

Whether you're just starting out or want to expand your expertise, we have a variety of classes for Scala Certified Partners as well as new and existing customers. Classes are held regularly at our state-of-the-art facilities featuring hands on experience with long time Scala experts. Training is provided in one of our training facilities in PA, CA or The Netherlands. Class sizes are limited to ensure you'll always get hands-on experience and personal attention. Other locations and on-site training are available. Contact us if you have a request.
